INDEX TO SUBJECTS

A

A cells, glucagon-producing, dog gastric mucosa, biochemical and immunocytochemical and EM study 455

Acetylcholine receptor clusters, cultured muscle fibers, cytochemical light and EM study, 501

— receptors, junctional and extrajunctional, after α-bungarotoxin binding, mouse neuromuscular junctions, autoradiographic EM study, 144

Acetylcholinesterase, growth-related, WRL-10A fibroblasts, biochemical study, 638

Acrosome, giant, *Suncus murinus*, asymmetry of spermiation, sperm surface charge patterns, light and EM study, 415

Actin, nonfilamentous, aggregates of and associated proteins, echinoderm sperm, biochemical and EM study, 73

—, nonfilamentous, nonrandom distribution, association with membranes, echinoderm sperm, biochemical and EM study, 51

Actomyosin content, *Physarum* plasmodia, cross-reactions with myosin of related species, biochemical and immunological study, 393

Adhesion, mouse peritoneal macrophages, effect of cytochalasin B, biochemical and cytological study, 407

Affinity sites, divalent cations, *Paramecium aurelia*, cytochemical EM and X-ray microprobe study, 429

Alga *Chlamydomonas reinhardtii*, chloroplast, use of [*methyl*-^{3}H]thymidine to measure DNA synthesis, biochemical study, 215

— *Chlamydomonas reinhardtii*, thylakoid membranes, cyclic variations of polypeptide incorporation, biochemical and EM study, 327

—, colorless *Polytoma obtusum*, cytoplasmic and nuclear genomes, fine structure of mitochondria and leucoplast, EM study, 352

—, colorless *Polytoma obtusum*, cytoplasmic and nuclear genomes, organelle nucleic acids, biochemical and EM study, 371

—, colorless *Polytoma obtusum*, cytoplasmic and nuclear genomes, ribosomal RNA cistrons of nucleus and leucoplast, biochemical study, 383

—, green *Scenedesmus acuminatus* and *S. acutiformis*, copper accumulation and intranuclear complexes, EM and energy-dispersive X-ray analysis, 210

— *Polytomella agilis*, flagellar apparatus and cytoplasmic microtubules immunofluorescence and light and EM study, 106

Apoprotein, B, plasma lipoproteins, rat liver subcellular localization, immunological and light and EM study, 241

Aster, sperm, rabbit zygote, structure and function of, autoradiographic and light and EM study, 539

Auxin treatment of pea epicotyls, subcellular localization of cellulases, immunocytochemical EM study, 97

B

Basal bodies *Paramecium*, effect of nuclease and protease digestion, light and autoradiographic EM study, 622

Bone marrow, guinea pig femur, megakaryocyte isolation, use of platelet aggregation inhibitors, light and EM study, 159

—, rat, collagenous matrix-induced endochondral ossification and hemopoiesis, biochemical and EM study, 557

Brain, guinea pig, synaptosomes, coated-vesicle shells, particle/chain material, and tubulin, biochemical and EM study, 608

α-Bungarotoxin binding, mouse neuromuscular junctions, junctional and extrajunctional acetylcholine receptors, autoradiographic EM study, 144

C

Calcium accumulation, mitochondria, visualization of stimulated nerve endings, X-ray and EM study, 513

Calcium affinity sites, *Paramecium aurelia*, cytochemical EM and X-ray microprobe study, 429

Calcium ion concentrations, *Physarum polycephalum* plasmodia, physiological study, 223

Callus tissue, *Corylus avellana*, embryogenesis, bound ribosomes, EM study, 686

Carbamylcholine prevention of giant granule formation, beige (Chediak-Higashi) mouse fibroblasts, cytological study, 205

Casein secretion and surface regeneration, role of vesicle coat material, rat mammary epithelial cells, EM study, 173

Cat, superior cervical ganglion, visualization of stimulated nerve endings by mitochondrial calcium accumulation, X-ray and EM study, 513

Cations, divalent, affinity sites, *Paramecium aurelia*, cytochemical EM and X-ray microprobe study, 429

—, magnesium, sodium, and potassium, effect on squid giant axon membrane, EM study, 19

Cell cycle, effect on polypeptide incorporation, *Chlamydomonas reinhardtii* thylakoid membranes, cyclic variations, biochemical and EM study, 327

Cells, beige (Chediak-Higashi) mouse fibroblasts, prevention of giant granule formation by carbamylcholine, cytological study, 205

—, Chinese hamster ovary, nucleotide permeability by

Tween-80 treatment, DNA replication, biochemical and scanning EM study, 732
—, decidual, human ovary, reflexive gap junctions, EM study, 495
—, ependymoglial, hypophysectomized frog larvae, thyroid hormone regulation of gap junction differentiation, biochemical and freeze-fracture EM study, 669
—, epithelial, rat mammary, role of vesicle coat material in casein secretion and surface regeneration, EM study, 173
—, erythroid, chick embryo, lectin receptors, number, mobility, and distribution during maturation, light and fluorescence microscope study, 647
—, HeLa and L-929, action of dichlorobenzimidazole riboside on RNA synthesis, biochemical study, 229
—, HeLa, spindle microtubules, differential stability to pressure-induced depolymerization, phase-contrast and EM study, 443
—, HTC metaphase, relationship between chromosome condensation and lysine-rich histone phosphorylation, biochemical and EM study, 43
—, *Macaca nemestrina* smooth muscle and dermal fibroblasts, stimulation of proliferation by platelet factors, autoradiographic and cytological study, 196
—, 3T3, spreading filopodia, substrate-exploring function, phase-contrast and scanning EM study, 275
—, WRL-10A fibroblasts, growth-related acetylcholinesterase, biochemical study, 638
Cellulases, subcellular localization in auxin-treated pea epicotyls, immunocytochemical EM study, 97
Centrifugation, isopycnic gradient, mitochondrial changes during transition into lactation, mouse mammary gland, biochemical study, 573
Chemotaxis, *Physarum polycephalum* plasmodia, light microscope study, 218
Chick embryo erythroid cells, lectin receptors, number, mobility, and distribution during maturation, light and fluorescence microscope study, 647
Chloroplast, *Chlamydomonas reinhardtii*, use of [*methyl*-^{3}H]thymidine to measure DNA synthesis, biochemical study, 215
Chromosomes, salamander, molecular hybridization of iodinated 4S, 5S, and 18S+28S RNA, biochemical and cytological study, 287
— condensation and lysine-rich histone phosphorylation, metaphase HTC cells, biochemical and EM study, 43
Cilia, *Paramecium caudatum*, mating-reactive membrane vesicles, biochemical and EM study, 736
Clusters, acetylcholine receptor, cultured muscle fibers, cytochemical light and EM study, 501
Coat structures and intramembrane particles, *Trypanosoma cruzi*, cytochemical and freeze-fracture EM study, 507
— structures, vesicles, rat mammary epithelial cells, role in casein secretion and surface regeneration, EM study, 173
Colchicine binding reaction, properties of tubulin, sea urchin eggs, biochemical study, 599
Copper accumulation and intranuclear complexes, green alga, EM and energy dispersive X-ray analysis, 210
Crayfish *Procambarus clarkii*, retina, ultrastructural and molecular characteristics of photoreceptor membranes, freeze-fracture EM study, 721
Cytochalasin B, effect on adhesion of mouse peritoneal macrophages, biochemical and cytological study, 407
Cytoplasm, microtubules, and flagellar apparatus, *Polytomella agilis*, immunofluorescence and light and EM study, 106
— and nucleus, alga *Polytoma*, fine structure of mitochondria and leucoplast, EM study, 352
— and nucleus, alga *Polytoma*, organelle nucleic acids, biochemical and EM study, 371

D

Deoxyribonucleic acid replication, Chinese hamster ovary cells permeable to nucleotides by Tween-80 treatment, biochemical and scanning EM study, 732
— acid synthesis, measurement using [*methyl*-^{3}H]thymidine, *Chlamydomonas reinhardtii* chloroplasts, biochemical study, 215
Depolymerization, pressure-induced, spindle microtubules, differential stability in HeLa cells, phase contrast and EM study, 443
Dichlorobenzimidazole riboside action on RNA synthesis, HeLa and L-929 cells, biochemical study, 229
Diuresis, saline, *Necturus* proximal tubules, morphological changes in tight junctions, physiological and freeze-fracture EM study, 90
Dog, stomach, glucagon-producing cells in gastric mucosa, biochemical and immunocytochemical and EM study, 455

E

Echinoderm *Thyone briareus*, sperm, aggregates of nonfilamentous actin and associated proteins, biochemical and light and EM study, 73
— *Thyone briareus*, sperm, nonrandom distribution of nonfilamentous actin, association with membranes, biochemical and EM study, 51
Embryogenesis, callus tissue, *Corylus avellana*, bound ribosomes, EM study, 686
Endoplasmic reticulum *N*-dealkylations, rat liver, succinate enhancement of formaldehyde accumulation from, biochemical and EM study, 589
Enzyme, acetylcholinesterase, growth-related, WRL-10A fibroblasts, biochemical study, 638
Enzymes, cellulases, subcellular localization in auxin-treated pea epicotyls, immunocytochemical EM study, 97
—, marker, cytochrome oxidase and monoamine oxidase, mitochondrial membrane, mouse mammary gland transition into lactation, biochemical and EM study, 581
—, nuclease and protease, effects on basal body ultrastructure, *Paramecium*, light and autoradiographic EM study, 622
Epicotyl, pea, auxin-treated, subcellular localization of cellulases, immunocytochemical EM study, 97
Exocytosis, effect on *Paramecium* trichocyst membrane, EM study, 313

F

Factor, platelet, stimulation of fibroblast and smooth muscle cell proliferation, autoradiographic and cytological study, 196
Fat body, *Chironomus thummi*, hemoglobin synthesis, biochemical study, 264
Femur, guinea pig, megakaryocyte isolation from bone marrow, use of platelet aggregation inhibitors, light and EM study, 159
Fibrils, pore-connecting, amphibian oocyte nuclear envelope, biochemical and EM study, 1
Filaments, ring of, budding yeast plasma membrane, EM study, 717
Filopodia, spreading 3T3 cells, substrate-exploring function, phase-contrast and scanning EM study, 275
Fixative, role in neuromuscular junction structure, frog and mouse, physiological and EM study, 521
—, and cytoplasmic microtubules, *Polytomella agilis*, immunofluorescence and light and EM study, 106
Formaldehyde accumulation from rat liver endoplasmic reticulum *N*-dealkylations, succinate enhancement of, biochemical and EM study, 589
Frog *Rana pipiens*, hypophysectomized larvae, ependymoglial cells, thyroid hormone regulation of gap junction differentiation, biochemical and freeze-fracture EM study, 669
— *Rana pipiens*, neuromuscular junctions, effects of osmotic pressure on structure, physiological and EM study, 521
—, retina, rhodopsin in rod outer segment plasma membrane, biochemical and autoradiographic light and EM study, 29

G

G-actin, nonrandom distribution, echinoderm sperm, biochemical and EM study, 51
Ganglion, superior cervical, visualization of stimulated nerve endings by mitochondrial calcium accumulation, X-ray and EM study, 513
Gene transcription, ribosomal RNA, regulation during amphibian oogenesis, autoradiographic and biochemical and light and EM study, 465
Genetic analysis, membrane differentiation, trichocyst cycle of paramecium mutants, freeze-fracture EM study, 126
Germinal vesicle nucleus, toad oocytes, storage receptacle for proteins, biochemical study, 659
Glucagon production, dog gastric mucosa A-cells, biochemical and immunocytochemical and EM study, 455
Glycosides, cardiac, effect on squid giant axon membrane, EM study, 19
Granule, giant, prevention of formation by carbamylcholine, beige (Chediak-Higashi) mouse fibroblasts, cytological study, 205
Growth, compensatory, mouse kidney, conservation of ribosomal RNA, biochemical study, 548
—, intussusceptive, *Euglena* surface, role for submembranous proteins and microtubules, biochemical and immunological and EM study, 693
—, relation to acetylcholinesterase, WRL-10A fibroblasts, biochemical study, 638
Guinea pig, brain synaptosomes, coated-vesicle shells, particle/chain material, and tubulin, biochemical and EM study, 608
— pig, femur, megakaryocyte isolation from bone marrow, use of platelet aggregation inhibitors, light and EM study, 159

H

Hemoglobin synthesis, *Chironomus thummi* fat body, biochemical study, 264
Hemopoiesis and endochondral ossification, collagenous bone matrix-induced, biochemical and EM study, 557
Histone, lysine-rich, relationship between chromosome condensation and phosphorylation of, metaphase HTC cells, biochemical and EM study, 43
— ovary, gap junctions between processes of same decidual cell, EM study, 495
Hybridization, molecular, 4S, 5S, and 18S+28S RNA to salamander chromosomes, biochemical and cytological study, 287

I

Insect *Chironomus thummi*, fat body, hemoglobin synthesis, biochemical study, 264
Intestine, rat, microvilli fuzzy surface coat, freeze-etch EM study, 491

J

Junctions, gap, differentiation, thyroid hormone regulation, ependymoglial cells, hypophysectomized from larvae, biochemical and freeze-fracture EM study, 669
—, gap, reflexive, between processes of same decidual cell, human ovary, EM study, 495
—, neuromuscular, mouse, junctional and extrajunctional acetylcholine receptors after α-bungarotoxin binding, autoradiographic EM study, 144
—, tight, *Necturus* kidney proximal tubules undergoing saline diuresis, physiological and freeze-fracture EM study, 90

K

Kidney, mouse, compensatory hypertrophy, conservation of ribosomal RNA, biochemical study, 548
—, *Necturus maculosus*, proximal tubules undergoing saline diuresis, morphological changes in tight junctions, physiological and freeze-fracture EM study, 90

L

Lactation, mouse mammary gland, mitochondrial changes during transition to, isopycnic gradient centrifugation, biochemical study, 573
—, mouse mammary gland, mitochondrial changes during transition to, membrane ultrastructure and marker enzymes, biochemical and EM study, 581
Larvae, hypophysectomized frog, ependymoglial cells, thyroid hormone regulation of gap junction differentiation, biochemical and freeze-fracture EM study, 669

Lectin receptors, number, mobility, and distribution during maturation, chick erythroid cells, light and fluorescence microscope study, 647
Leucoplast, alga *Polytoma*, nucleic acid characterization, biochemical and EM study, 371
— and mitochondria fine structure, alga *Polytoma*, EM study, 352
— and nucleus, ribosomal RNA cistrons, alga *Polytoma*, biochemical study, 383
Lipoproteins, rat liver, subcellular localization of B apoprotein, immunological and light and EM study, 241
Liver, rat, organelle interaction, succinate enhancement of formaldehyde accumulation from endoplasmic reticulum *N*-dealkylations, biochemical and EM study, 589
—, rat, subcellular localization of B apoprotein of plasma lipoproteins, immunological and light and EM study, 241

M

Macrophages, peritoneal, mouse, effect of cytochalasin B on adhesion, biochemical and cytological study, 407
Mammary gland, mouse, mitochondria, changes during transition into lactation, isopycnic gradient centrifugation, biochemical study, 573
— gland, mouse, mitochondria, changes during transition into lactation, membrane ultrastructure and marker enzymes, biochemical and EM study, 581
Mating reactivity, membranes vesicles, *Paramecium* cilia, biochemical and EM study, 736
Matrix, collagenous, endochondral ossification and hemopoiesis, rat bone, biochemical and EM study, 557
Megakaryocyte isolation from guinea pig femoral marrow, use of platelet aggregation inhibitors, light and EM study, 159
Membrane association, nonfilamentous actin distribution, echinoderm sperm, biochemical and EM study, 51
— differentiation, genetic analysis, paramecium mutants, trichocyst cycle, freeze-fracture EM study, 126
—, photoreceptor, ultrastructural and molecular characteristics, crayfish retina, freeze-fracture EM study, 721
—, plasma, budding yeast, ring of filaments, EM study, 717
—, plasma, rod outer segment, rhodopsin in, frog retina, biochemical and autoradiographic light and EM study, 29
—, squid giant axon, ionic and cardiac glycoside-sensitive structures, EM study, 19
— structure, *Trypanosoma cruzi*, cytochemical and freeze-fracture EM study, 507
—, thylakoid, *Chlamydomonas reinhardtii*, cyclic variations of polypeptide incorporation, biochemical and EM study, 327
—, trichocyst, *Paramecium*, effect of exocytosis, EM study, 313
— ultrastructure and marker enzymes, mitochondrial changes during transition into lactation, mouse mammary gland, biochemical and EM study, 581
— vesicles, mating-reactive, *Paramecium* cilia, biochemical and EM study, 736
[*Methyl*-^{3}H]thymidine, measurement of DNA synthesis, *Chlamydomonas reinhardtii* chloroplasts, biochemical study, 215
Microtubules, cytoplasmic, and flagellar apparatus, *Polytomella agilis*, immunofluorescence and light and EM study, 106
—, sea urchin, heterogeneity of tubulin alpha subunit, biochemical study, 301
—, spindle, HeLa cells, differential stability to pressure-induced depolymerization, phase-contrast and EM study, 443
— and submembranous proteins, role in intussusceptive surface growth, *Euglena*, biochemical and immunological and EM study, 693
Microvilli, rat intestine, fuzzy surface coat, freeze-etch EM study, 491
Mitochondria, cervical ganglion, visualization of stimulated nerve endings by calcium accumulation, X-ray and EM study, 513
— and leucoplast fine structure, alga *Polytoma*, EM study, 352
—, mouse mammary gland, changes during transition into lactation, isopycnic gradient centrifugation, biochemical study, 573
—, mouse mammary gland, changes during transition into lactation, membrane ultrastructure and marker enzymes, biochemical and EM study, 581
Mouse, beige (Chediak-Higashi), fibroblasts, prevention of giant granule formation by carbamylcholine, cytological study, 205
—, diaphragm, neuromuscular junctions, effects of osmotic pressure on structure, physiological and EM study, 521
—, kidney compensatory hypertrophy, conservation of ribosomal RNA, biochemical study, 548
—, mammary gland, mitochondria, changes during transition into lactation, isopycnic gradient centrifugation, biochemical study, 573
—, mammary gland, mitochondria, changes during transition into lactation, membrane ultrastructure and marker enzymes, biochemical and EM study, 581
—, neuromuscular junctions, junctional and extrajunctional acetylcholine receptors after α-bungarotoxin binding, autoradiographic study, 144
—, peritoneal macrophages, effect of cytochalasin B on adhesion, biochemical and cytological study, 407
Mucosa, gastric, dog, glucagon-producing cells, biochemical and immunocytochemical and EM study, 455
Muscle fibers, chick, ultrastructure of acetylcholine receptor clusters, cytochemical light and EM study, 501
Myosin, plasmodia, cross-reaction with *Physarum* and related species, biochemical and immunological study, 393

N

N-dealkylations, rat liver endoplasmic reticulum, succinate enhancement of formaldehyde accumulation from, biochemical and EM study, 589
Necturus maculosus, kidney, proximal tubules undergoing saline diuresis, morphological changes in tight junctions, physiological and freeze-fracture EM study, 90

Nerve endings, stimulated, visualization of by mitochondrial calcium accumulation, X-ray and EM study, 513
— fiber, giant, squid, ionic and cardiac glycoside-sensitive structures in axolemma, EM study, 19
Neuromuscular junctions, frog and mouse, effects of osmotic pressure on structure, physiological and EM study, 521
— junctions, mouse, junctional and extrajunctional acetylcholine receptors after α-bungarotoxin binding, autoradiographic EM study, 144
Newt *Triturus alpestris*, oocytes, regulation of gene transcription of ribosomal RNA during oogenesis, autoradiographic and biochemical and light and EM study, 465
— *Triturus alpestris*, *T. cristatus*, *Pleurodeles waltlii*, toad *Xenopus laevis*, oocytes, nuclear envelope, fibrils connecting pore complexes, biochemical and EM study, 1
Nuclease and protease digestion, effects on basal body ultrastructure, *Paramecium*, light and autoradiographic EM study, 622
Nucleic acids, alga *Polytoma* organelles, biochemical and EM study, 371
Nucleotide permeability by Tween-80 treatment, DNA replication, Chinese hamster ovary cells, biochemical and scanning EM study, 732
Nucleus, amphibian oocytes, fibrils connecting nuclear pore complexes, biochemical and EM study, 1
— and cytoplasm, alga *Polytoma*, fine structure of mitochondria and leucoplast, EM study, 352
— and cytoplasm, alga *Polytoma*, organelle nucleic acids, biochemical and EM study, 371
—, germinal vesicle, toad oocytes, storage receptacle for proteins, biochemical study, 659
—, green alga, copper accumulation, EM and energy dispersive X-ray analysis, 210
— and leucoplast, ribosomal RNA cistrons, alga *Polytoma*, biochemical study, 383

O

Oocytes, amphibian, regulation of gene transcription of ribosomal RNA during oogenesis, autoradiographic and biochemical and light and EM study, 465
Oocytes, amphibian, vitellogenin incorporation, biochemical study, 345
—, newts and toad, nuclear envelope, fibrils connecting pore complexes, biochemical and EM study, 1
—, sea urchin, properties of tubulin, colchicine binding reaction, biochemical study, 599
—, toad, germinal vesicle nucleus, storage receptacle for proteins, biochemical study, 659
Organ culture, fat body, *Chironomus thummi*, hemoglobin synthesis, biochemical study, 264
Organelle interaction, rat liver, succinate enhancement of formaldehyde accumulation from endoplasmic reticulum *N*-dealkylations, biochemical and EM study, 589
Osmotic pressure, effect on structure of neuromuscular junctions, frog and mouse, physiological and EM study, 521
Ossification, endochondral, and hemopoiesis, collagenous bone matrix-induced, biochemical and EM study, 557
Ovary, human, gap junctions between processes of same decidual cell, EM study, 495

P

Particle/chain material, coated-vesicle shells, and tubulin, guinea pig brain synaptosomes, biochemical and EM study, 608
Particles, intramembrane, and surface coat components, *Trypanosoma cruzi*, cytochemical and freeze-fracture EM study, 507
Phosphorylation, lysine-rich histone, relationship to chromosome condensation, metaphase HTC cells, biochemical and EM study, 43
Photoreceptor membranes, ultrastructural and molecular characteristics, crayfish retina, freeze-fracture EM study, 721
Plant, hazel *Corylus avellana*, callus tissue, embryogenesis, bound ribosomes, EM study, 686
—, pea *Pisum sativum*, auxin-treated epicotyls, subcellular localization of cellulases, immunocytochemical study, 97
Plasmodia, *Physarum*, actomyosin content, cross-reactions with myosins of related species, biochemical and immunological study, 393
—, *Physarum polycephalum*, control of chemotaxis, light microscope study, 218
—, *Physarum polycephalum*, oscillations of calcium ion concentrations, physiological study, 223
Platelet aggregation inhibitors, megakaryocyte isolation from guinea pig femoral marrow, light and EM study, 159
— factor stimulation of fibroblast and smooth muscle cell proliferation, autoradiographic and cytological study, 196
Polypeptide incorporation, *Chlamydomonas reinhardtii* thylakoid membranes, cyclic variations, biochemical and EM study, 327
Pore complexes, amphibian oocyte nuclear envelope, connecting fibrils, biochemical and EM study, 1
Pressure induction of spindle microtubule depolymerization, differential stability in HeLa cells, phase-contrast and EM study, 443
Protease and nuclease digestion, effects on basal body ultrastructure, *Paramecium*, light and autoradiographic EM study, 622
Protein, apo-, B, plasma lipoproteins, rat liver subcellular localization, immunological and light and EM study, 241
— incorporation, amphibian oocytes, vitellogenin specificity, biochemical study, 345
— storage receptacle, germinal vesicle nucleus, toad oocytes, biochemical study, 659
Proteins, association with nonfilamentous actin, echinoderm sperm, biochemical and EM study, 73
—, submembranous, and microtubules, role in intussusceptive surface growth, *Euglena*, biochemical and immunological and EM study, 693
Protozoan *Euglena gracilis*, intussusceptive surface growth, role for submembranous proteins and microtubules, biochemical and immunological and EM study, 693
— *Paramecium aurelia*, divalent cation affinity sites, cytochemical EM and X-ray microprobe study, 429

Protozoan *Paramecium caudatum*, cilia, mating-reactive membrane vesicles, biochemical and EM study, 736
— *Paramecium caudatum*, trichocyst membrane, effect of exocytosis, EM study, 313
— *Paramecium tetraurelia*, basal body, effects of nuclease and protease digestion, light and autoradiographic EM study, 622
— *Paramecium tetraurelia*, trichocyst cycle, genetic analysis of membrane differentiation, freeze-fracture EM study, 126
— *Trypanosoma cruzi*, surface coat components and intramembrane particles, cytochemical and freeze-fracture EM study, 507

R

Rabbit, zygote, sperm aster structure and function, autoradiographic and light and EM study, 539
Radioactive label, [^{14}C]acetylcholine, growth-related acetylcholinesterase, WRL-10A fibroblasts, biochemical study, 638
— label, [^{14}C]formaldehyde and [^{14}C]leucine, vitellogenin incorporation, amphibian oocytes, biochemical study, 345
— label, [^{14}C]thymidine, [^{3}H]CTP, and [^{3}H]TTP, nucleotide permeability by Tween-80 treatment, DNA replication, Chinese hamster ovary cells, biochemical and scanning EM study, 732
—, label, [^{14}C] or [^{3}H]adenine and [^{32}P]phosphate, organelle nucleic acids, colorless alga *Polytoma*, biochemical and EM study, 371
— label, [^{14}C] or [^{3}H]adenine and [^{32}P]phosphate, ribosomal RNA cistrons of nucleus and leucoplast, alga *Polytoma*, biochemical study, 383
— label, [^{14}C] or [^{3}H]arginine polypeptide incorporation, *Chlamydomonas reinhardtii* thylakoid membranes, cyclic variations, biochemical and EM study, 327
— label, [^{14}C] or [^{3}]orotic acid, [^{14}C] or [^{3}H]uridine, and [*methyl*-^{3}H]methionine, conservation of ribosomal RNA during compensatory renal hypertrophy, biochemical study, 548
— label, [^{14}C] or [^{3}H]thymidine, [*methyl*-^{3}H]thymidine and thymine, use of [*methyl*-^{3}H] thymidine for measurement of DNA synthesis, *Chlamydomonas reinhardtii* chloroplasts, biochemical study, 215
— label, [^{45}Ca]calcium chloride and [^{59}Fe]iron, collagenous bone matrix-induced endochondral ossification and hemopoiesis, biochemical and EM study, 557
— label, ^{3}H-amino acids and [^{3}H]δ-aminolevulinic acid, hemoglobin synthesis, *Chironomus thummi* fat body, biochemical study, 264
— label, [^{3}H]leucine and [^{3}H]uridine, action of dichlorobenzimidazole riboside on RNA synthesis, HeLa and L-929 cells, biochemical study, 229
— label, [^{3}H]leucine and [^{3}H]uridine, effects of nuclease and protease digestion on *Paramecium* basal bodies, light and autoradiographic EM study, 622
— label, [^{3}H]leucine, rhodopsin in rod outer segment plasma membrane, frog retina, biochemical and autoradiographic light and EM study, 29
—label, [^{3}H]thymidine, fibroblast and smooth muscle cell proliferation, stimulation by platelet factors, autoradiographic and cytological study, 196
Radioactive label, [^{3}H]thymidine, sperm aster structure and function, rabbit zygote, autoradiographic and light and EM study, 539
—label, [^{3}H]uridine, hypophysectomized frog larvae, ependymoglial cells, thyroid hormone regulation of gap junction differentiation, biochemical and freeze-fracture EM study, 669
—label, [^{3}H]uridine, regulation of gene transcription of ribosomal RNA during amphibian oogenesis, autoradiographic and biochemical and light and EM study, 465
—label, [^{125}I]-α-bungarotoxin, junctional and extrajunctional acetylcholine receptors after α-bungarotoxin binding, mouse neuromuscular junctions, autoradiographic EM study, 144
—label, [^{125}I]glucagon and [^{125}I]insulin, glucagon-producing cells, dog gastric mucosa, biochemical and immunocytochemical and EM study, 455
—label, [^{125}I]RNA, molecular hybridization of 4S, 5S, and 18S + 28S RNA to salamander chromosomes, biochemical and cytological study, 287
—label, [^{32}P]phosphate, chromosome condensation and lysine-rich histone phosphorylation, metaphase HTC cells, biochemical and EM study, 43
Rat, bone, collagenous matrix-induced endochrondral ossification and hemopoiesis, biochemical and EM study, 557
—, intestine, microvilli fuzzy surface coat, freeze-etch EM study, 491
—, liver, organelle interaction, succinate enhancement of formaldehyde accumulation from endoplasmic reticulum *N*-dealkylations, biochemical and EM study, 589
—, liver, subcellular localization of B apoprotein of plasma lipoproteins, immunological and light and EM study, 241
Retina, crayfish, ultrastructural and molecular characteristics of photoreceptor membranes, freeze-fracture EM study, 721
—, frog, rhodopsin in rod outer segment plasma membrane, biochemical and autoradiographic light and EM study, 29
Rhodopsin, rod outer segment plasma membrane, frog retina, biochemical and autoradiographic light and EM study, 29
Ribonucleic acid, ribosomal cistrons, alga *Polytoma* nucleus and leucoplast, biochemical study, 383
—acid, ribosomal, conservation of during compensatory renal hypertrophy, biochemical study, 548
—acid, ribosomal, regulation of gene transcription during amphibian oogenesis, autoradiographic and biochemical and light and EM study, 465
—acid, 4S, 5S, and 18S + 28S, iodinated, molecular hybridization to salamander chromosomes, biochemical and cytological study, 287
—acid synthesis, HeLa and L-929 cells, action of dichlorobenzimidazole riboside on, biochemical study, 229
Riboside, dichlorobenzimidazole, action on RNA synthesis, HeLa and L-929 cells, biochemical study, 229
Ribosomes, alga *Polytoma* nucleus and leucoplast, RNA cistrons, biochemical study, 383

Ribosomes, bound, *Corylus avellana* embryogenic callus tissue, EM study, 686
Rod outer segment plasma membrane, rhodopsin in, frog retina, biochemical and autoradiographic light and EM study, 29

S

Salamander *Taricha g. granulosa* and *Batrachoseps wrighti*, chromosomes, molecular hybridization of iodinated 4S, 5S, and 18S + 28S RNA, biochemical and cytological study, 287
Saline diuresis, *Necturus* proximal tubules, morphological changes in tight junctions, physiological and freeze-fracture EM study, 90
Sea urchin *Strongylocentrotus purpuratus*, eggs, properties of tubulin, colchicine binding reaction, biochemical study, 599
—urchin *Strongylocentrotus purpuratus*, microtubules, heterogeneity of tubulin alpha subunit, biochemical study, 301
Shrew *Suncus murinus*, spermatozoa, asymmetry of spermiation and surface charge patterns over giant acrosome, light and EM study, 415
Slime mold *Physarum polycephalum*, plasmodia, actomyosin content, cross-reactions with myosins of related species, biochemical and immunological study, 393
— mold *Physarum polycephalum*, plasmodia, control of chemotaxis, light microscope study, 218
— mold *Physarum polycephalum*, plasmodia, oscillations of calcium ion concentrations, physiological study, 223
Sperm aster, rabbit zygote, structure and function of, autoradiographic and light and EM study, 539
—, echinoderm, aggregates of nonfilamentous actin and associated proteins, biochemical and light and EM study, 73
—, echinoderm, nonrandom distribution of nonfilamentous actin, association with membranes, biochemical and EM study, 51
Spermatozoa, *Suncus murinus*, asymmetry of spermiation and surface charge patterns over giant acrosome, light and EM study, 415
Spindle microtubules, HeLa cells, differential stability to pressure-induced depolymerization, phase-contrast and EM study, 443
Squid *Sepioteuthis sepioidea*, giant nerve fiber, ionic and cardiac glycoside-sensitive structures in axolemma, EM study, 19
Stomach, dog, glucagon-producing cells in gastric mucosa, biochemical and immunocytochemical and EM study, 455
Storage form, aggregates of nonfilamentous actin and associated proteins, echinoderm sperm, biochemical and light and EM study, 73
Substrate exploration, function of filopodia, spreading 3T3 cells, phase-contrast and scanning EM study, 275
Succinate enhancement of formaldehyde accumulation from rat liver endoplasmic reticulum *N*-dealkylations, biochemical and EM study, 589
Surface changes, number, mobility and distribution of lectin receptors during maturation, chick erythroid cells, light and fluorescence microscope study, 647
Surface changes, charge patterns, asymmetry of spermiation, *Suncus murinus* giant acrosome, light and EM study, 415
—coat, rat intestine microvilli, freeze-etch EM study, 491
—coat structures and intramembrane particles, *Trypanosoma cruzi*, cytochemical and freeze-fracture EM study, 507
—growth, intussusceptive, *Euglena*, role for submembranous proteins and microtubules, biochemical and immunological and EM study, 693
—regeneration and casein secretion, role of vesicle coat material, rat mammary epithelial cells, EM study, 173
Synaptosomes, guinea pig brain, coated-vesicle shells, particle/chain material, and tubulin, biochemical and EM study, 608

T

Thylakoid membranes, *Chlamydomonas reinhardtii*, cyclic variations of polypeptide incorporation, biochemical and EM study, 327
Thymidine, [*methyl*-^{3}H], measurement of DNA synthesis, *Chlamydomonas reinhardtii* chloroplasts, biochemical study, 215
Thyroid hormone regulation of gap junction differentiation, ependymoglial cells, hypophysectomized frog larvae, biochemical and freeze-fracture EM study, 669
Tissue culture, chick embryo muscle fibers, ultrastructure of acetylcholine receptor clusters, cytochemical light and EM study, 501
Toad *Xenopus laevis*, oocytes, germinal vesicle nucleus, storage receptacle for proteins, biochemical study, 659
—*Xenopus laevis*, oocytes, vitellogenin incorporation, biochemical study, 345
Trichocyst cycle, paramecium mutants, genetic analysis of membrane differentiation, freeze-fracture EM study, 126
—membrane, *Paramecium*, effect of exocytosis, EM study, 313
Tubules, proximal, *Necturus* kidney undergoing saline diuresis, morphological changes in tight junctions, physiological and freeze-fracture EM study, 90
Tubulin alpha subunit, heterogeneity of, sea urchin microtubules, biochemical study, 301
—, coated-vesicle shells, and particle/chain material, guinea pig brain synaptosomes, biochemical and EM study, 608
—, sea urchin eggs, colchicine binding reaction, biochemical study, 599
Tween-80 treatment and nucleotide permeability, DNA replication, Chinese hamster ovary cells, biochemical and scanning EM study, 732

V

Vesicle coat material, role in casein secretion and surface regeneration, rat mammary epithelial cells, EM study, 173

Vesicle coat material, coated, particle/chain material, and tubulin, guinea pig brain synaptosomes, biochemical and EM study, 608
—, germinal, toad oocytes, nucleus as storage receptacle for proteins, biochemical study, 659
—, membrane, mating-reactive, *Paramecium* cilia, biochemical and EM study, 736
Vitellogenin incorporation, amphibian oocytes, biochemical study, 345

Y

Yeast *Saccharomyces cerevisiae*, budding, plasma membrane, ring of fibroblasts, EM study, 717

Z

Zygote, rabbit, sperm aster structure and function, autoradiographic and light and EM study, 539
